
Environmental Policy Statement

Objectives.

Guy Raymond Engineering Limited are committed to recognizing and reducing the environmental impacts directly under their control both locally and globally to the absolute minimum reasonably practicable.

Progress towards achieving the above objectives shall be realized through:

- [a] continued recognition, evaluation and monitoring of environmental aspects and impacts such that feasible objectives and targets for reduction in impact can be formulated leading to *protection and* reduction in pollution.
- [b] recognition of legal obligations of the company and the implementation of plans and arrangements to ensure compliance with statutory limits as a minimum.
- [c] the implementation of a documented management system, fully integrated with existing management systems complying with the requirements of BS EN ISO 14001.
- [d] continued review and monitoring of environmental indicators through frequent management and workforce interaction to ensure effective operation of the implemented management system and continued improvement of environmental performance.

Implementation.

Implementation of the policy shall be through communication to and the involvement and training of the workforce in the aims, rationale and objectives of environmental management.

As an initial commitment to communication, this policy statement shall be displayed in relevant areas such that workforce and public have access to it.

Signed

C.Daniels

C.Daniels, Managing Director.
On behalf of Guy Raymond Engineering Limited.
